[] Comment. The map was prepared on the basis of a rough copy of the original map. Locations marked by letters are those where the precise identification of the site is in question:

- A - Wench'uan (温泉), a town within the indicated garrisoned area surrounding the atomic energy plant. It will be noted that while the text states that this area is protected by Soviet troops, the map indicates, probably in error, only a Chinese garrison.
- B - Ot'ushih (阿图什), a town garrisoned by Chinese troops, lying at the joining of the highways from Aksu and Khotan. According to a map of Sinkiang highways, dated 1948, this could be Yarkand, Kashgar, or Pach'u (Maral Bashi). Kashgar was selected as the most probable location of the garrison, in view of paragraph 2 of
- C - Wuch'ia (烏恰), a town garrisoned by Chinese troops. Ulugh Chat (Wuluk'och'iati), on the road to Irkeshtam, appeared to be the town indicated.
- D - Minfeng (民丰), a town garrisoned by Chinese troops lying midway between Charkhlik and Khotan. This may be Keriya (Yutien).
- E - The Kashmir area was clearly indicated as on the Indian side of the international border. The mining area may lie in the zone where the boundary is not clearly defined.
